## PROJECTS

**Hospital SYSTEM** — Back End — GitHub: [LINK](#)

System for management of a large hospital with appointments for doctors and nurses, there are appointments for surgeries, and each patient has his own bed, and there is a pharmacy system. (BY PHP Laravel)

**E-Commerce SYSTEM** — Back End — GitHub: [LINK](#)

System for store in which there is a place for the user and a place for the admin to manage offers and requests, and there is registration in more than one way, in addition to that it is multi-language. (BY PHP Laravel)

**Vezeeta SYSTEM** — Back End — GitHub: [LINK](#)

System for medical reservations such as System Vezeeta.

(BY PHP Laravel)

**Front-end Mentor —** Front End

I made 10 designs from www.frontendmentor.io

The sweet thing about this site is that there are tasks of different difficulty, and when you finish and upload it on github, there are developers with different experience who will see your code and advise you about your mistakes.
